

Discover Cutting-Edge Statistical Techniques for Social Sciences!

New Statistical Procedures for the Social Sciences

In today's data-driven world, researchers in the social sciences need access to the most advanced statistical techniques to make sense of complex information. ***New Statistical Procedures for the Social Sciences*** is a comprehensive and accessible guide to the latest research methods, providing social scientists with the tools they need to conduct rigorous and informative data analysis.

Key Features:

- Covers a wide range of topics, including exploratory data analysis, hypothesis testing, regression analysis, and multivariate analysis.
- Written in a clear and concise style, making it easy to understand even for those with limited statistical background.
- Includes numerous examples and illustrative figures, demonstrating how to apply the techniques in practice.
- Accompanied by a companion website with supplementary materials, including datasets and R code.

Benefits:

- Enhance your research capabilities with state-of-the-art statistical methods.
- Gain a deeper understanding of complex datasets and their implications.

- Produce more accurate and informative research findings.
- Stay ahead of the curve in the rapidly evolving field of statistical analysis.

Table of Contents:

Part 1: to Statistical Analysis

New Statistical Procedures for the Social Sciences: Modern Solutions To Basic Problems by Rand R. Wilcox

★★★★☆ 4.5 out of 5

Language : English
File size : 15519 KB
Text-to-Speech : Enabled
Screen Reader : Supported
Enhanced typesetting : Enabled
Print length : 444 pages

- Chapter 1: Overview of Statistical Concepts
- Chapter 2: Data Collection and Management

Part 2: Exploratory Data Analysis

- Chapter 3: Univariate Analysis
- Chapter 4: Bivariate Analysis
- Chapter 5: Multivariate Analysis

Part 3: Hypothesis Testing

- Chapter 6: T-Tests
- Chapter 7: Analysis of Variance (ANOVA)
- Chapter 8: Non-parametric Tests

Part 4: Regression Analysis

- Chapter 9: Simple Linear Regression
- Chapter 10: Multiple Regression
- Chapter 11: Logistic Regression

Part 5: Advanced Statistical Topics

- Chapter 12: Factor Analysis
- Chapter 13: Structural Equation Modeling
- Chapter 14: Bayesian Analysis

About the Authors:

New Statistical Procedures for the Social Sciences is authored by a team of experienced researchers and educators who are at the forefront of statistical innovation. Their collective expertise ensures that the book provides readers with a cutting-edge perspective on the latest research methods.
