

# Maximize Your Availability With Application Clusters And Oracle Data Guard

In today's competitive business environment, it is more important than ever to ensure that your applications and data are available 24/7. Downtime can cost businesses millions of dollars in lost revenue, productivity, and customer satisfaction. Oracle Application Clusters and Oracle Data Guard are two powerful technologies that can help you to maximize the availability of your applications and data.

## Oracle Database 11g Release 2 High Availability: Maximize Your Availability with Grid Infrastructure, RAC and Data Guard: Maximize Your Availability with ... Application Clusters, and Oracle Data Guard by Scott Jesse

Oracle Application Clusters provide high availability by running multiple instances of your applications on different servers. If one server fails, the other servers can continue to run your applications, ensuring that your users have uninterrupted access to your applications.

Oracle Data Guard provides data protection by maintaining multiple copies of your data on different servers. If one server fails, the other servers can continue to provide access to your data, ensuring that your data is always available.

This book will teach you how to use Oracle Application Clusters and Oracle Data Guard to maximize the availability of your applications and data. You will learn how to configure, manage, and monitor Oracle Application Clusters and Oracle Data Guard, and how to use them to protect your applications and data from downtime.

## **What You Will Learn**

- How to configure Oracle Application Clusters
- How to manage Oracle Application Clusters
- How to monitor Oracle Application Clusters
- How to configure Oracle Data Guard
- How to manage Oracle Data Guard
- How to monitor Oracle Data Guard
- How to use Oracle Application Clusters and Oracle Data Guard to protect your applications and data from downtime

## **Who Should Read This Book**

This book is intended for anyone who is interested in learning how to use Oracle Application Clusters and Oracle Data Guard to maximize the availability of their applications and data. This book is especially relevant for:

- Database administrators
- System administrators
- Application developers
- IT managers
